## QUALITY, PROMPT DELIVERY, and above all, RESPECT

We are very proud of our company and our reputation. Our mission was to become vertically integrated, and by working in collaboration with our employees, we have become a leader in the lumber industry. Our products are built in our own factory and installed right on time. We have developed our enterprise resource planning system with an IT partner so that we may monitor our calendar in real time and thus ensure its accuracy.

We have added to our product offering! You will find even MORE under the same roof for your home project.

### A word from the President...

Ever since we founded our company in 1977, our first priority was to emphasize to our employees and partners the importance of being quality conscious at every stage of production. With this philosophy in mind, we have built up a dynamic team, that prides itself in its work!

Claude Paquette

CEO, Bois Mirabel Ltée

### The NOBILITY of wood...

Wood allows for creativity.

Wood is comfort and charm.

Wood is a sustainable investment.

Wood leaves a small ecological footprint.

Real-time monitoring system  
of the schedules

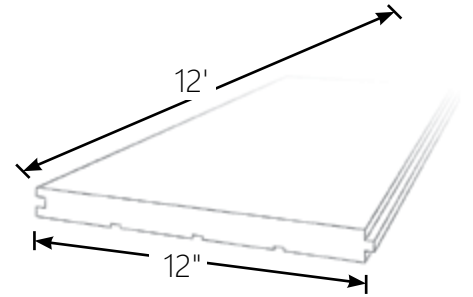

# OUR LATEST PRODUCTS

## WIDE PLANK FLOORING

We keep on pushing back the limits of architectural creativity. Thanks to a technology that is unique in Quebec, we can create non-standard flooring that is very large and very long. In fact, Mirabel Wood has acquired a tongue and groove milling machine allowing us to make planks measuring up to 12" (30 cm) in width and up to 12' (360 cm) in length. The floor ends are also tongue and grooved.

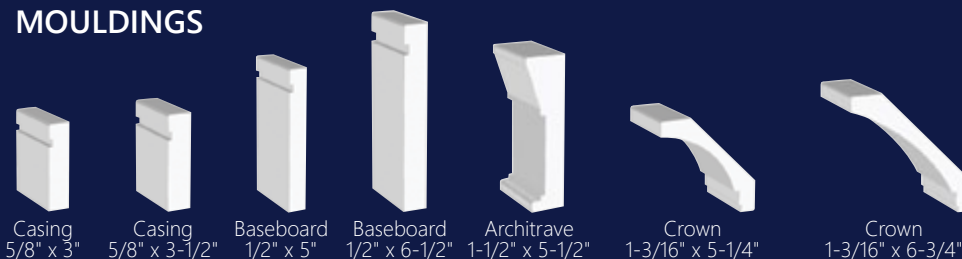

## WEST END COLLECTION

Refined, modern and sophisticated, this contemporary collection features sharp angles, as well as smart architectural detail.

# STAIRS

Mirabel Wood has a finish workshop and a paintshop. Our stair components are factory prefinished for a superior result. This eliminates inconveniences caused by sanding, staining and varnishing, thus lowering the risks of poisoning from chemical products in your home.

## CUSTOMISED DESIGN

In our Boucherville factory, we use a computer numeric control (CNC) machine. With our computer-assisted drawing software (CAD), we can design and manufacture any model you could think of, from balusters to columns, according to your tastes and needs.

We can serve you in record time, regardless of the desired model. The final product is of total quality and unmatched precision.

\*\* The installation of floating flooring on concrete requires the use of a vapor-barrier.

Colours shown may differ from those of the actual products.

Our solid wood flooring is made at our Boucherville factory. Varnishing in a controlled environment (our factory) protects you from odours and poisoning from chemical products. You do not need to worry about sanding, staining or varnishing. Moreover, you are guaranteed of a flawless finish from our factory.

# ARCHITECTURAL FLOORING (WIDE PLANK)

All species of wood are available at Mirabel Wood, in plain sawn or quarter-sawn.

Mirabel Wood uses a tongue and groove milling machine to produce planks measuring up to 12" (30 cm) in width and up to 12' (360 cm) in length. Thanks to this technology, unique in Quebec, we can make non-standard flooring according to your needs

We can also tongue and groove the board ends.

# CUSTOM-MADE ARCHITECTURAL DOORS

Mirabel Wood makes customized massive interior doors from all species of trees, most often Spanish cedar and African mahogany.

We now offer a wide selection of top-of-the-range decorative hardware for your doors. All doors are also available with transom.

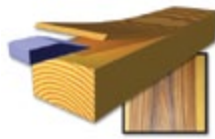

# ARCHITECTURAL DOORS

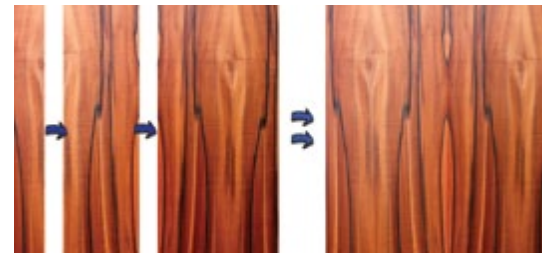

## BOOKMATCHED VENEER

Mirabel Wood offers a catalogue (sample of veneers) to customers who wish to push even further the boundaries of architecture. We can make solid core doors in all sizes. Then, you select the species of wood. The resulting panel will show a perfect sequence of wood veins. There are about a hundred possibilities. We will assist you with your choice of hardware.

"Bookmatching" is an alternating, continuous, symmetrical motif, obtained by turning over the veneer panels, resembling the pages of a book, the joined pages of which are facing each other. The obtained effect is the continuity in wood veins from one door to the other. The wood logs are cut lengthwise.

At our paintshop located at our factory in Boucherville, some items can be made-to-measure in the desired wood species, texture and colour to coordinate your décor perfectly.

# GLUED PANELS, COUNTERS AND **BUTCHER BLOCK**

Mirabel Wood uses a hydraulic press. We can make all types of wooden counters, regardless of their size and thickness. We can precut holes for the sink and the plumbing, based on your architectural plans.

We use natural oil for our wooden butcher blocks, since these may come into contact with edible material.

# ISLAND AND TABLE LEGS

## SPECIALIZED TURNING SERVICE FOR CABINETMAKING

The CNC turning system is an integral component of our operations. We can develop models and manufacture them in record time. We are able to create or copy almost any model.

All colours and wood species are available on order.

# EXTERIOR WOODEN GARAGE DOORS

Mirabel Wood makes garage doors from African mahogany as well as Spanish cedar. We use high-end hardware for intensive use. The quality of this product is distinctly superior and compares to none other. All styles are available.

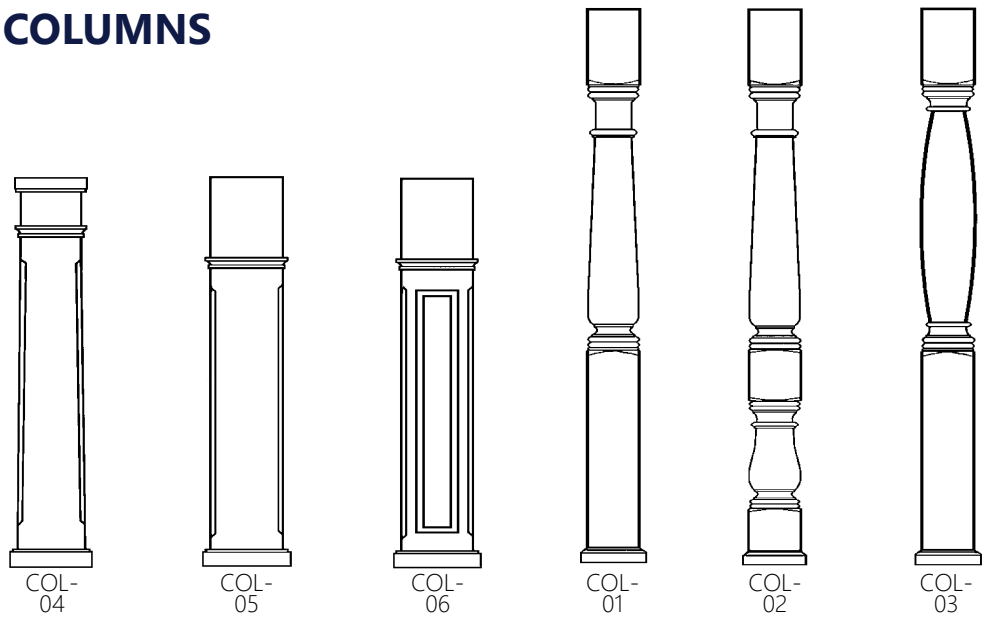

# WOODEN OUTDOOR HANDRAILS

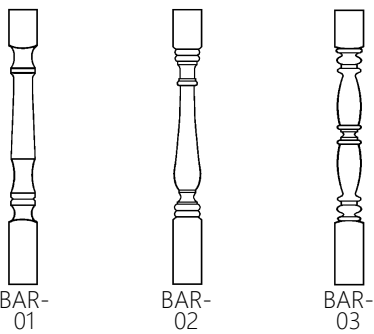

We have developed models for wooden outdoor handrails, available in poplar and Spanish cedar, the species of wood which are most resistant to our climate. Our models can also be modified to met our clients’ needs.

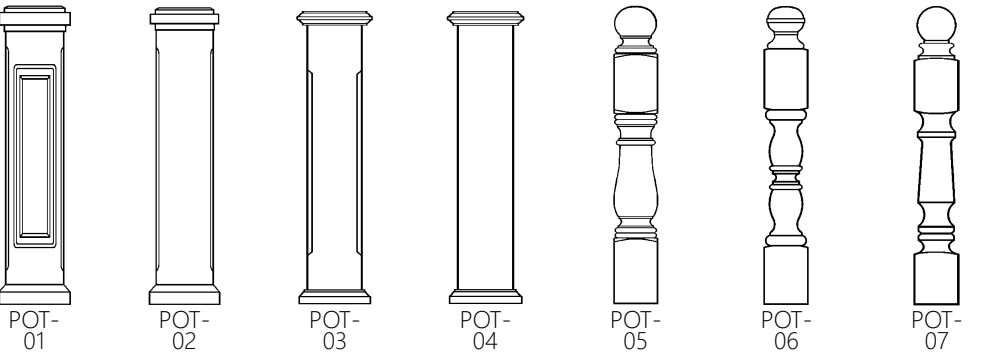

## COLUMNS

## BALUSTERS

## NEWELS

## COMPONENTS

## FINIALS

Proportions differ from images shown. Columns 01 to 03 are approximately 96" high, columns 04 to 06 are approximately 48" in height. The posts are 46 ½" high, and the balusters are 28 ½" high. All pieces can be custom-made in all sizes, as requested.

# FINISH WORKSHOP

## PAINTSHOP

### DESIGN

We have powerful drawing software to create your architectural wooden projects for custom-made stairs and woodworking elements. At our Boucherville factory, we use a computer numerical control (CNC) machine to make an endless array of balusters and columns, based on your tastes and needs.

### FACTORY FINISH

We have a finish workshop, including a paintshop, at our Boucherville factory. In order to provide a superior quality product, we suggest, when possible, a factory finish of your wooden components, prior to installation.

### COLOURIST

We have onsite professional colourists, one with over 25 years of experience. We have developed a unique technique for wood finishing and colouring, allowing us to bring out the colour in its most precise detail, depth, opacity and luster. We can coordinate all products made onsite or bought elsewhere.

### RESTORATION

We can restore or repair your furniture or any other wooden architectural component to like new condition or we can coordinate it with your new décor. The work is done on site in our workshop, with an unmatched attention for detail.

# OUR SERVICES

## FINANCING

Do not put off your renovation projects until tomorrow! Make your projects a reality today, thanks to our Accord D Financing Plan, which allows you to finance your projects based on your needs.

## DELIVERY

We offer our own delivery service. At Mirabel Wood, we ensure the accuracy of your order and an adherence to the schedule by monitoring it in real time on our enterprise resource planning system. Ask us about available arrangements.

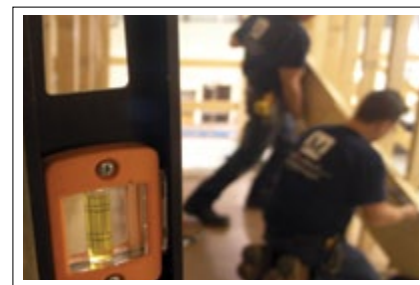

## INSTALLATION

We have a team of experts to install our products. Our professionals are punctual and do higher quality work. Each step of the installation is carefully planned on the calendar, monitored in real time.

## TECHNICAL ADVISOR

Our stairs and flooring experts are able to identify potential problems with your structure prior to installation. They will suggest corrective actions as needed in order to ensure a result that is compliant, strong and durable.

## DISTRIBUTION OF EXOTIC WOOD

Mirabel Wood is an importer and exotic wood wholesaler of popular species of wood in North America, but also Brazilian wood, African species and others from Europe, Asia or Australia. The wood hardness chart for each wood species is available on our website.
